Modal Verbs Modal verbs (modals) are verbs that add the meaning of logical possibility, ability, necessity, and permission to verbs, which have a degree of strength from stronger to weaker. Modals come before infinitive verbs and the "to" is removed. Modals do not need to match their subject in plural agreement, so there is no need to add an "-s" or "-es" ending to a modal. Modals will often be seen in sentences that are predicting a future possibility, describing an ability, giving advice, making requests, or asking for permission. The nine most common modals are *can, could, shall, should, will, would, may, might*, and *must*. Below is a detailed description of these modal verbs.
